Investor Pitch Deck: Eradicating Learning Poverty through YouthRise Changemakers

Slide 1: Executive Summary & The Vision Eradicating Learning Poverty from the Ground Up

- **The Vision:** To build and scale an international-standard organization dedicated to eradicating learning poverty, led by a visionary founding team committed to systemic educational transformation.
 - **The Core Thesis:** You cannot build a house from the roof. Sustainable development, economic parity, and social resilience begin with Foundational Literacy and Numeracy (FLN) by Grade 3.
 - **The Opportunity:** Backing a proven, community-first intervention model ready for multi-region scaling across informal settlements and rural expansion zones.
-

Slide 2: The Problem – The Global & Regional Learning Crisis Millions in School, But Not Learning

- **The Global Reality:** Globally, 9 in 10 children in low-income countries cannot read or understand a simple text by age ten. Millions enter and exit primary school without mastering basic reading, writing, and numeracy.
- **Systemic Root Causes:** This is not a child's failure; it is a structural breakdown driven by:
 - Undertrained teachers lacking effective pedagogical tools.
 - Rigid language barriers and overcrowded classrooms.

- Absent early childhood education and hungry learners.
- Numerically and digitally excluded adults.
- **The Societal Ripple Effect:** Unaddressed FLN gaps drive early school dropouts, escalating vulnerability to teenage pregnancies, child marriages, drug abuse, and intergenerational poverty.

[Unaddressed FLN Gap] → [Grade 3 Dropout] → [Societal Crises & Intergenerational Poverty]

Slide 3: The Solution – YouthRise Changemakers 3-Pillar Model

A Comprehensive, Community-First Intervention

YouthRise Changemakers deploys a multi-pronged intervention that simultaneously targets the learner, the teacher, the parent, and the home environment through three interlocking pillars:

- **Pillar 1 – Teacher Professional Development (PD)**
 - Co-designed and endorsed by frameworks like TaRL Africa, Uwezo Kenya, and the PAL Network.
 - Delivers rigorous training in FLN pedagogy, bilingual/mother-tongue instruction, activity-based learning, and continuous assessment for learning.
- **Pillar 2 – Child-Centred Learning Sessions**
 - Groups children by ability rather than strict age-grade constraints.
 - Combats cognitive barriers by providing nutritious porridge and utilizing engaging storytelling, games, and songs.
- **👤 Pillar 3 – Adult Literacy & Digital Inclusion Classes**
 - Equips parents and community members with foundational reading and digital skills to support home learning and break the intergenerational cycle of low

literacy.

Slide 4: Impact & Monitoring Framework

Rigorous Measurement of Scale and Outcomes

Our monitoring, evaluation, and learning (MEL) framework ensures absolute accountability and continuous improvement across all operations:

Indicator		
Category	Key Metric & Target	Monitoring Method & Frequency
Student FLN Mastery	% of Grade 3 learners reading with comprehension and solving basic numeracy problems	Baseline, mid-line, and end-line assessments using TaRL/Uwezo tools (Termly)
Teacher Capacity	% of teachers certified as YouthRise FLN Educators demonstrating level-based pedagogy	Classroom observations, coaching logs, and peer learning circles (Monthly/Quarterly)
Educational Attainment	Reduction in primary dropout rates and successful transition to secondary schooling	School attendance registries and longitudinal tracking (Annual)
Social Resilience	Delayed adolescent pregnancies and reduced vulnerability to early child marriage	Community health tracking data integration (Annual)
Community Engagement	Attendance and literacy progression in Adult Literacy & Digital Inclusion classes	Class registers and digital competency tests (Bi-annually)

Slide 5: Why It Matters – The Strategic Imperative

Scale Without a Foundation is Fragile

- **Beyond the Classroom:** Literacy and foundational skills are the strongest protective factors against social vulnerability. Mastering reading builds self-belief, keeps girls in school, and provides marginalized youth with viable economic futures.
 - **Aligning the Root with the Vision:** Solving the FLN crisis is the exact proving ground required for a CEO and co-founder dedicated to eliminating learning poverty. Every element of executive leadership—shaping vision, building high-performing teams, and driving innovation—is actively forged through this work.
-

Slide 6: The Investment Case – Why Back My Vision & Leadership?

Partner in Transforming Education at Scale

- **Root-Cause Strategy:** I am committed to fixing educational poverty at its deepest structural level rather than applying superficial band-aids.
- **Operationalized Model:** YouthRise Changemakers is a living, adaptable framework proven across informal settlements and ready for structured expansion.
- **Visionary Execution:** My mission as co-founder and CEO is to build elite teams, empower communities, and drive generational change.

///

"The CEO I aim to become is being built right here—one learner, one community, and one root cause at a time. Join us in turning this vision into reality."
